## **Hepatitis B Vaccine Offer**

All employees who have the potential or who "reasonably anticipate" exposure to patients' blood and body substances while performing duties of their job are offered the Hepatitis B vaccine, free of charge, at Parkview.

Hepatitis B vaccine is very safe and effective. It will not cause Hepatitis B infection. The vaccine is not developed from human blood products; rather, it is derived from yeast cells.

A series of three intramuscular injections are given into the deltoid (arm) muscle at 0, 1 and 6 months. Studies have shown that over 90% of healthy adults developed complete protection against Hepatitis B virus after the vaccine was given.

The most common side effects following administration of the vaccine are: soreness and redness at the injection site for approximately 48 hours, and a low grade fever. Complaints of feeling tired and joint pain are infrequent and, if present, usually last for only a few days. Side effects usually decrease with subsequent doses. Hepatitis B vaccine should not be administered to individuals with hypersensitivity to yeast or vaccine components. This vaccine would not be expected to be harmful to a developing fetus; **however**, its safety of use for a fetus has not yet been clearly demonstrated.

A statement from your personal doctor will be required if you wish to receive the vaccine and have a condition requiring medication, are pregnant or nursing, or have a problem with allergies. You should not receive the vaccine when you are currently sick.

Hepatitis B is a viral infection that is caused by Hepatitis B virus (HBV). In the United States, 12,000 to 18,000 health care workers are infected annually with HBV. Of these health care workers, 200 to 300 die each year, while others may become chronic carriers of Hepatitis B, or develop chronic active hepatitis, cirrhosis or liver cancer.

Parkview encourages any employee who has exposure to blood and body substances on the job, to protect themselves from Hepatitis B by receiving the vaccine.

Please check the appropriate area below:

HEPBACC (Hepatitis B Vaccine Accepted)
My job may include exposure to blood and body s

My job may include exposure to blood and body substances. I am interested in receiving the Hepatitis B vaccine. I will receive the first vaccine today. I understand I need to return to Parkview Occupational Health/Employee Health Services in 1 month and 6 months in order to complete the 3 dose series. I will set appointments for those dates today.

#### ☐ HEPBDEC (Hepatitis B Vaccine Declined)

I understand that due to my occupational exposure to blood and body substances, I may be at risk of acquiring Hepatitis B virus. I have been given the opportunity to be vaccinated with Hepatitis B vaccine at no charge to me when my employment at Parkview begins. I decline the Hepatitis B vaccination. I understand that, by declining this vaccine, I will be at risk of acquiring Hepatitis B, a serious disease. If, in the future, I continue to have occupational exposure to blood or body substances and I want to be vaccinated with the Hepatitis B vaccine, I can receive the vaccination series at no charge to me.

I have read the above information and understand its contents.

### **Blood Borne Disease Precautions**

Health Care Workers (HCW) are at greater risk of being exposed to the Hepatitis B Virus (HBV), the Human Immunodefi ciency Virus (HIV) and other infectious diseases in the work place. **It is mandatory at Parkview to follow Universal Blood and Body Substance Precautions.** By doing so, it provides a greater protection to employees who are or may be exposed to blood and body substances. These precautions include, but are not limited to the following:

- 1. Gloves must be worn with all blood and body substance contact. Gowns, masks and eye protection must be worn with expected direct contact to blood and body substances on clothing or any part of the body.
- 2. When responding to Code Blue situations, use a CPR mask when mouth-to-mouth resuscitation is needed, until the Code Blue Team arrives.
- 3. Do not recap needles manually. If recapping is needed, use recapping devices. Place all used disposable sharp objects in the closest "sharps" container. Use hemostats instead of hands to remove sharp objects from holders.
- 4. Wash hands immediately following exposure to blood or body substances, including after removing gloves.
- 5. Dispose of infectious waste separately, in a clearly labeled container, which Parkview provides.
- 6. If you have draining lesions (including draining or red eyes), dermatitis or rash, you may not work until being evaluated and released for work by Employee Health Services.
- 7. You are responsible for learning the location and proper use of protective equipment in your work area and using it whenever appropriate.
- 8. Any exposure to the eye from blood or body substance must be seen in the Emergency Department (ED), immediately, for proper cleansing and flushing of the eye.
- 9. All contaminated needle or sharps punctures and mucous membrane exposures should be cleansed immediately and seen in Employee Health Services or the ED if Employee Health Services is closed, as soon as possible, for proper follow up treatment (must be done prior to leaving work).
- 10. If an exposure or injury does occur, your supervisor should be notifed and an Incident Report filled out and brought with you to Employee Health Services or the ED if Employee Health Services is closed.

#### I have read the above information and understand its contents.

#### Part A. Section 2. (Mandatory)

Every employee who has been selected to use **any** type of respirator must answer questions 1 through 9 below.

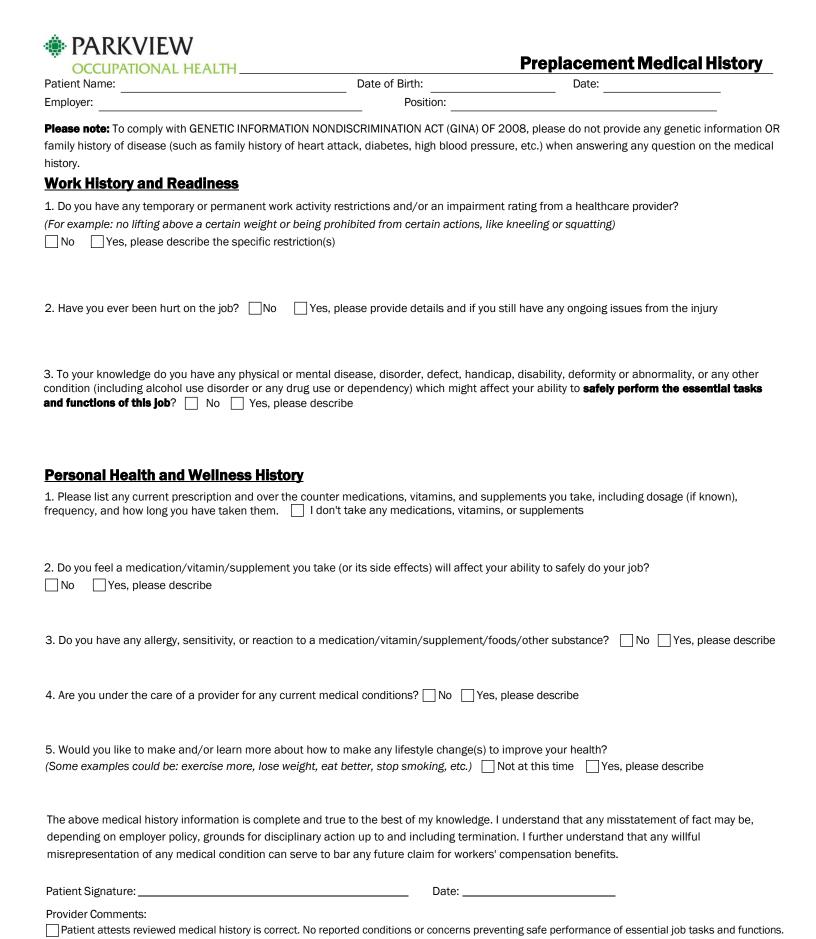

- 1. Do you currently smoke tobacco, or have you smoked tobacco in the last month?
- 2. Have you ever had any of the following conditions?
  - a. Seizures (fits):
  - b. Diabetes (sugar disease):
  - c. Allergic reactions that interfere with your breathing:
  - d. Claustrophobia (fear of closed-in places):
  - e. Trouble smelling odors:
- 3. Have you ever had any of the following pulmonary or lung problems?
  - a. Asbestosis:
  - b. Asthma:
  - c. Chronic bronchitis:
  - d. Emphysema:
  - e. Pneumonia:
  - f. Tuberculosis:
  - g. Silicosis:
  - h. Pneumothorax (collapsed lung):
  - i. Lung cancer:
  - i. Broken ribs:
  - k. Any chest injuries or surgeries:
  - 1. Any other lung problem that you've been told about:
- 4. Do you currently have any of the following symptoms of pulmonary or lung illness?
  - a. Shortness of breath:
  - b. Shortness of breath when walking fast on level ground or walking up a slight hill or incline:
  - c. Shortness of breath when walking with other people at an ordinary pace or level ground:
  - d. Have to stop for breath when walking at your own pace on level ground:
  - e. Shortness of breath when washing or dressing yourself:
  - f. Shortness of breath that interferes with your job:
  - g. Coughing that produces phlegm (thick sputum):
  - h. Coughing that wakes you early in the morning:
  - i. Coughing that occurs mostly when you are lying down:
  - j. Coughing up blood in the last month:
  - k. Wheezing:
  - 1. Wheezing that interferes with your job:
  - m. Chest pain when you breathe deeply:
  - n. Any other symptoms that you think may be related to lung problems:

#### Part A. Section 2. (Mandatory) (Continued)

- 5. Have you ever had any of the following cardiovascular or heart problems?
  - a. Heart attack:
  - b. Stroke:
  - c. Angina:
  - d. Heart failure:
  - e. Swelling in your legs or feet (not caused by walking):
  - f. Heart arrhythmia (heart beating irregularly):
  - g. High blood pressure:
  - h. Any other heart problem that you've been told about:
- 6. Have you ever had any of the following cardiovascular or heart problems?
  - a. Frequent pain or tightness in your chest:
  - b. Pain or tightness in your chest during physical activity:
  - c. Pain or tightness in your chest that interferes with your job:
  - d. In the past two years, have you noticed your heart skipping or missing a beat:
  - e. Heartburn or indigestion that is not related to eating:
  - f. Any other symptoms that you think may be related to heart or circulation problems:
- 7. Do you currently take medication for any of the following problems?
  - a. Breathing or lung problems:
  - b. Heart trouble:
  - c. Blood pressure:
  - d. Seizures (fits):
- 8. If you've used a respirator, have you ever had any of the following problems?
  - a. Eye irritation:
  - b. Skin allergies or rashes:
  - c. Anxiety:
  - d. General weakness or fatigue:
  - e. Any other problem that interferes with your use of a respirator:
- 9. Would you like to talk to the healthcare professional who will review this questionnaire about your answers to this questionnaire?

Questions 10 to 15 below must be answered by every employee who has been selected to use either a full-face piece respirator or a self-contained breathing apparatus (SCBA). For employees who have been selected to use other types of respirators, answering these questions is voluntary.

- 10 Have you ever lost vision in either eye (temporarily or permanently)?
- 11 Do you currently have any of the following vision problems?
  - a. Wear contact lenses:
  - b. Wear glasses:
  - c. Color blind:
  - d. Any other eye or vision problem:
- 12. Have you ever had an injury to your ears, including a broken ear drum?
- 13. Do you currently have any of the following hearing problems?
  - a. Difficulty hearing:
  - b. Wear a hearing aid:
  - c. Any other hearing or ear problem:
- 14. Have you ever had a back injury?
- 15. Do you currently have any of the following musculoskeletal problems?
  - a. Weakness in any of your arms, hands, legs, or feet:
  - b. Back pain:
  - c. Difficulty fully moving your arms and legs:
  - d. Pain or stiffness when you lean forward or backward at the waist:
  - e. Difficulty fully moving your head up or down:
  - f. Difficulty fully moving your head side to side:
  - g. Difficulty bending at your knees:
  - h. Difficulty squatting to the ground:
  - i. Climbing a flight of stairs or a ladder carrying more than 25 lbs:
  - j. Any other muscle or skeletal problem that interferes with using a respirator:
